The Indian Land Tenure Foundation is a national, community-based organization focused on American Indian land recovery and management. We promote education, increase cultural awareness, create economic opportunity, and reform the legal and administrative systems that prevent Indian people from owning and controlling their rightful homelands.

Historic Allotment-Related Legislation: General

Although the General Allotment Act of 1887 was the first major piece of legislation designed to allot Indian reservations across the United States, many tribes were allotted according to particular treaty stipulations or under specific acts ratifying agreements between tribes and the federal government, sometimes decades before the General Allotment Act. (See the following table, “Historic Allotment Legislation: Tribe/Reservation Specific, by State” for this information.)

Listed below are pieces of legislation applicable broadly to Indian tribes who have not been allotted under specific, special legislation. Please refer to the actual text in *Kappler’s Indian Affairs: Laws and Treaties* for the complete provisions of the acts. In addition to legislation that allotted land, also listed is legislation touching a multitude of issues arising from allotment, such as leasing, the determination of heirs and disposal of allotment lands, the powers or the secretary of interior over allotment lands, the determination of Indian “competency,” and so on.
